PROFESSIONAL SUMMARY

Software Engineer with a Computer Engineering background (**GPA 3.72/4.00**) from **Institut Teknologi Sepuluh Nopember (ITS)**, specializing in AI systems, full-stack development, and automation engineering. Experienced in building and deploying end-to-end applications across **web, mobile, and cloud** platforms using **Python, JS, TS, Node.js, React, and REST APIs**. Proven ability to develop scalable solutions, including recommendation systems, computer vision models, and event-driven automation workflows. **Bangkit Academy graduate** with hands-on experience delivering production-ready systems through cross-functional collaboration (ML, Cloud, Mobile). Focused on designing efficient, data-driven, and scalable software solutions to solve real-world problems.

EDUCATION

INSTITUT TEKNOLOGI SEPULUH NOPEMBER

August 2021 – September 2025

Bachelor of Computer Engineering (GPA: 3.72 / 4.00)

- **Thesis:** Development of a 360° Camera System with Dynamic View Control for Digital Twin of a Music Concert Using Unreal Engine 5.
- **Fields of Study Interest:** Machine Learning, Deep Learning, Computer Vision, Cloud Computing, Internet of Things (IoT), Web Services & Internet Applications.
- **English Proficiency:** TOEFL ITP 573 (Intermediate-Advanced Level).

TECHNICAL PROFICIENCIES

JavaScript | Python | TypeScript | HTML | CSS | React.js | Next.js | Node.js | Express.js | Bootstrap | Tailwind CSS | MongoDB | MySQL | TensorFlow | Keras | Scikit-learn | OpenCV | Deep Learning | Computer Vision | Model Deployment | Google Cloud Platform (GCP) | Vercel | Docker | n8n | Google Apps Script | Pandas | Power BI | Microsoft Excel | Google Sheets | Git | GitHub | PostMan | RabbitMQ | CI/CD | Figma

EXPERIENCE

PT IDstar Cipta Teknologi

November 2025 – May 2026

Software Engineer Intern - Professional Services Acquisition (PSA)

- Orchestrated **10+ cross-platform automation workflows** supporting **3,000+ candidate recruitment processes, as measured by ~65% reduction in manual administrative workload**, by integrating n8n, Node.js bots, and REST APIs across WhatsApp, Discord, Gmail, Google Sheets, Calendar, and Docs.
- Engineered event-driven automation architecture **achieving ~2.5x operational throughput and ~40% increase in candidate response rate**, by leveraging Google Sheets as a single source of truth to trigger real-time, multi-channel workflows.
- Developed internal web applications and automation modules, **reducing document processing time from 2–3 hours to <10 minutes**, by utilizing Google Apps Script (GAS), HTML, and AI APIs (ChatGPT/Gemini) for automated document generation, data processing, and centralized dashboards.

LAB B201 – Network and Security

April 2023 – April 2025

Laboratory Assistant

- Administered **10+ virtualized Linux environments** supporting **50+ students per semester**, as measured by consistent lab availability and reduced system downtime, by leveraging VMware and Proxmox for academic and research workloads.

- Designed network infrastructure and security configurations, **improving system reliability and security by ~25%**, by implementing VLAN segmentation, firewall rules, and access control policies.
- Co-developed **5+ structured lab modules** enhancing student competency in Data Structures and Object-Oriented Programming (OOP), as measured by improved practical performance outcomes.

BANGKIT ACADEMY (Led by Google, Tokopedia, Gojek, Traveloka)

January 2024 – June 2024

Machine Learning Cohort

- Selected as **1 of 4,636 participants from 45,841 applicants** and completed a 900+ hour industry-driven program, as measured by end-to-end AI product delivery, by applying machine learning, deep learning, and cloud deployment workflows.
- Developed a hybrid recommendation system generating **1,000+ personalized outputs**, as measured by **RMSE 1.02 and MAE 0.795 (<1 rating deviation)**, by implementing collaborative filtering and content-based filtering using Python and curated datasets.
- **Engineered and deployed** a production-ready AI system improving personalization efficiency, by integrating ML pipelines (data preprocessing, feature engineering, model training) with Firebase Cloud and mobile application architecture in a cross-functional team (ML, Mobile, Cloud).

ORGANIZATIONAL EXPERIENCE

Computer Engineering Student Association (HIMATEKKOM ITS)

April 2023 – March 2024

Secretary

- Managed documentation for **20+ organizational programs**, as measured by **delivery of 50+ official documents (memos, permits, reports)**, by standardizing administrative workflows and documentation processes.
- **Coordinated 30+ events**, improving scheduling efficiency and tracking accuracy, by utilizing Google Calendar and Trello for centralized event management and analyzed organizational performance through **10+ evaluation reports** per semester

ACHIEVEMENTS

- **Best Final Project 2024 – BAKI**, ITS Telematics Final Project Exhibition
- **Bangkit Academy Graduate (A / 89.58)** with **100% attendance**, 2024

CERTIFICATIONS

- **Alibaba Cloud ACA Big Data Certification**, Alibaba Cloud, 2024–2026
Big data, data pipelines, ETL, data warehousing, Hadoop ecosystem, cloud computing
- **Bangkit Academy - Machine Learning Cohort**, Led by Google, Tokopedia, Gojek & Traveloka, 2024
Machine learning, deep learning, data preprocessing, model evaluation, cloud-based AI deployment
- **Samsung Innovation Campus Batch 5**, Samsung Indonesia, 2024
Python programming, data analysis, machine learning fundamentals, problem solving, IoT
- **Mathematics for Machine Learning and Data Science**, DeepLearning.AI, 2024
Linear algebra, calculus, probability, statistics, optimization for machine learning models

PROJECTS

- **BAKI – Body Analyzer & Kinetic Instructor**, AI-powered fitness app using Google ML Kit and k-NN to detect push-ups, sit-ups, and lunges in real time. Processed 33 pose landmarks for precise posture feedback. **Best Final Project 2024, ITS Telematics Exhibition.**
(Mobile | Machine Learning | Computer Vision) – [Link](#)
- **FitBuddy AI**, Voice-based fitness web coach built with TypeScript, Next.js, Gemini API & Vapi Voice AI. Delivers personalized workout and nutrition plans via real-time AI responses.
